What are the steps for designing a website?

1. An appointment with a web design specialist.
2. We discuss your goals, ideas, colors, layout and find out ideas for a domain name.
3. We give you a custom quote for your specific website design package.
4. We collect 50% of the 1st year package price.
5. We design a preview of the design idea and put it on a temporary location so you can review it and decide what to change or add.
6. We finish the design and add in all the information you have provided.
7. We finish the design and you approve how things look and provide us with any pictures or info needed to finish the site.
8. You approve that it is ready to launch.
9. We collect the remaining 1st year payment and launch the website.

What is a Micro-Site?

A Micro-Site is an extension of the website you have purchased. It usually is to show more information in a completely different area. For example, a community website may offer a micro-site to individual businesses to showcase their business separately from the main community site or an insurance or realty company may have a micro-site built for every agent. These micro-sites can have their own domain name that forwards directly to that area, and therefore seems like a website for the individual or business. It is usually formatted to be entered as www.maindomain.com/micrositename

Extras we offer

Add a mailing list for \$50

Add ecommerce for \$75 for every 5 items

Add a database solution for \$150

Add the ability to update parts of your site for \$65 the first page, then \$15 per page after that.

PerfectPC Services—Muncie, Indiana

A Small Business Consulting Company

3728 N Broadway Ave, Suite B
1-800-775-3928
info@perfectpcservices.com

PerfectPC Services is a small business technology consulting company with the vision of helping small businesses succeed with creative solutions for all their technology needs.

We work as consultants to effectively translate your company goals into valuable assets for your business. By giving our clients great advice, we have referrals over 10 generations deep!

Our creative ideas, designs, and management have helped companies become more efficient, be able to reach their clients better, and overall smooth the bumps of doing everyday business.

The companies and individuals we work with love being able to simply sit down and talk with knowledgeable technicians that can explain how to solve your technology needs in plain English. We enjoy helping you find those unique solutions.

Here are the most popular PerfectPC Services

- **Website Development** designed for you! Update your own pages, keep that calendar of events correct, list items in a database, advertise your products, add and remove your products from a shopping cart anytime.
- **Website optimization and marketing.** We will get your site visible affordably.
- **Computer repair;** online, on-site, and in-house. We do things differently; by scheduling all work, we can give each customer that personal attention they desire. Our prices are \$69 or less for online or in-house repairs with most repairs done the same day.
- **Unique Business solutions.** We offer multiple ways to protect your valuable data, remotely manage your systems, track your laptops, and allow you to secure your premises with cameras that you can view online.

Why Choose PerfectPC Services?

We are the preferred company in East Central Indiana for technology consulting. Not only do we offer the most unique solutions for your small business, but we back it up with over 20 years of computer experience.

We know we can solve every technology need you have in the most professional manner. We specialize in personalized consulting, which means we do not rush you into making a decision. We simply work with you towards solving your solutions effectively.

With the Internet rising to being the most important connection for any small business, **we can show you how to use the Internet to your advantage.** Whether its to save money by switching your phone service to Voice-Over-Internet, making sure your files are backed up securely and comply with HIPPA regulations, to helping you instantly with over the Internet computer support, **we do it all quickly, and efficiently.**
